## About Us

Precision color grading for motion pictures, episodics, and commercials. Operating as a specialized boutique studio, we provide a collaborative environment focused on the art and science of post-production. With over 300 projects delivered seamlessly over the last year, we offer an intimate, high-end finishing experience tailored to directors, DPs, and agencies. We pair technical rigor with a refined aesthetic eye to bring your vision to the screen exactly as intended.

## STUDIO PROFILE

[www.studiotunnel.com](http://www.studiotunnel.com)

## Our Studios

### Studio 01

- DaVinci Resolve
- Windows, AMD Threadripper - NVIDIA RTX 5080 OC
- Flanders Scientific XMP310 - HDR + LG C5 65 inch HDR TV

### Studio 02

- DaVinci Resolve
- Windows, AMD Threadripper - NVIDIA RTX 5080 OC
- ASUS ProArt PA32UCDM - HDR + LG C5 55 inch HDR TV

## Mastering & QC

- DaVinci Resolve / Adobe Premiere Pro / Qube
- Windows, AMD Ryzen 9 - NVIDIA RTX 3090
- ASUS ProArt PA32UCDM HDR Monitor
- HDR/SDR mastering
- Dolby Vision analysis capability
- Color calibration tools

## Conform

- DaVinci Resolve / Adobe Premiere Pro
- Workstation: Mac Studio
- Dolby Vision analysis capability

## Assist

- DaVinci Resolve
- Workstation: AMD Ryzen 9 - NVIDIA RTX 4070 OC + Mac Studio M4
- Monitor: Eizo ColorEdge CG279X x 2
- Software: DaVinci Resolve Studio

## Our Vision

To be Mumbai's premier color grading facility, delivering world-class post-production services with cutting-edge technology and uncompromising quality standards.

## Our Mission

Empowering filmmakers with professional color grading, mastering, and secure workflows that meet international certification standards.

## Our Commitment

Enterprise-grade security, HDR-capable monitoring, and dedicated workstations ensure your project receives the highest level of care and confidentiality.

## Our Facilities

Our color grading suites feature industry-standard DaVinci Resolve workstations with HDR-capable reference monitors, calibrated for accurate color reproduction. Each suite is RFID-secured and CCTV monitored for maximum security compliance.

Professional color grading environments designed for precision work.

## OUR COLORISTS

- YASH SONI
- SUJITH VIJAYAN
- SAMIRAN SONOWAL
- MANOJ SAHU

## TECHNICAL SPECIFICATIONS

[www.studiotunnel.com](http://www.studiotunnel.com)

### Data Security & Storage

#### Central Storage

- 250 TB shared storage (expandable)
- Enterprise firewall-protected network
- Segregated VLANs for artist, server, guest

#### Data Protection

- Encrypted internal transfers
- USB ports disabled on critical systems
- Daily incremental + weekly full backups

#### Network Security

- Zero-Trust WireGuard VPN
- Role-based firewall enforcement
- Two-network segmentation

**Enterprise-grade  
security infrastructure  
for certified post-  
production**

### HDR Capability

- Flanders Scientific XMP310  
ASUS ProArt PA32UCDM
- HDR10, HLG workflows supported
- Color management using ACES / DaVinci  
Intermediate

### Physical Security

- CCTV in all rooms, lobby, entrance
- RFID/card access for all suites
- Visitor sign-in and escort system

### Infrastructure

- Full UPS backup with surge protection
- Temperature-controlled rooms
- Redundant server cooling system
- NDAs for all staff

**Currently working on shows /  
films for Amazon Prime,  
Hotstar & AMX Player.**

## SECURE, ZERO-TRUST STUDIO NETWORK

[www.studiotunnel.com](http://www.studiotunnel.com)

### Key Security Principles

#### Secure VPN Access

All connections operate through encrypted WireGuard VPN tunnels, authenticated via public/private key pairs, eliminating password-based risks.

#### Role-Based Firewall

OPNsense applies per-peer firewall policies, defining access privileges by role and maintaining least-privilege principles across all systems.

#### Network Segmentation

Clear separation between Studio Team and Guest networks provides structured boundary without adding operational complexity.

**WireGuard-based  
secure VPN network  
built on OPNsense for  
certified operations.**

### Certification Standards

This deployment aligns with Amazon Prime Video Partner Facility Certification standards by combining encrypted connectivity, role-based access control, and auditable security enforcement within a modular and scalable framework.

### Peer Naming Convention

Each VPN peer follows a flat, suffix-based ID convention (e.g., WG-Edit-RO, WG-Admin-Full) for clear access mapping.

### Easy Onboarding

Visual network rule maps and modular configuration sheets enable intern-friendly setup, consistent provisioning, and straightforward compliance verification.
